PRODUCT HIGHLIGHT

KOVAR COMPATIBLE HERMETIC EMI CAPACITORS

This solderable EMI capacitor incorporates unique interface geometry, which assures a highly reliable solder joint between the capacitor and the low-expansion housing to which it is attached.

These same devices are compatible with other common low-expansion packaging materials such as Alloy 42, 46, 48 & 49.

These devices are currently available with capacitance values up to 8,000 pF. We would also consider any special requirements you may have.

Call us today for more information.
